

HVAC Systems Technician **Turn Your Passion Into a Career!**

The HVAC Systems Technician program prepares students to work in the heating, ventilation, air conditioning and refrigeration industry. The HVAC industry offers a broad range of opportunities working in residential, commercial, construction and industrial settings. Work typically performed includes services such as maintenance, inspection, troubleshooting, repair and/or replacement of HVAC equipment. This program also introduces the student to the environmentally friendly “green” activities of weatherization, sustainable building applications and EPA Section 608 universal certification testing.

An externship component will allow students to incorporate knowledge acquired in the program into practical application while gaining industry experience. Dorsey Schools HVAC Systems Technician program is designed to educate and train you in as little as nine months!
